

Electrak® Throttle Actuator

The Next Generation of Throttle Control Technology

Introducing the Thomson Electrak® Throttle Actuator

Transforming throttle control through innovative design

Thomson has taken the rugged, dependable features of the E050 Electrak® actuator and added capabilities making the throttle actuator an ideal solution for industrial vehicles where throttle control is required. It offers:

- Trusted performance
- Simplified installation
- Space-saving design
- Reduced environmental impact
- Minimal maintenance

Simplify installation and increase operator safety and productivity with the space-saving design and electromechanical interface, allowing engine speed controls to be placed in ergonomic positions.

Reduce the environmental impact of a vehicle by utilizing on-board electronic options such as the analog position feedback sensor, electronic limit switches, and CANBUS communication (SAE J1939), to automatically control engine RPM based upon engine demand to increase productivity while reducing fuel consumption, noise and emissions.

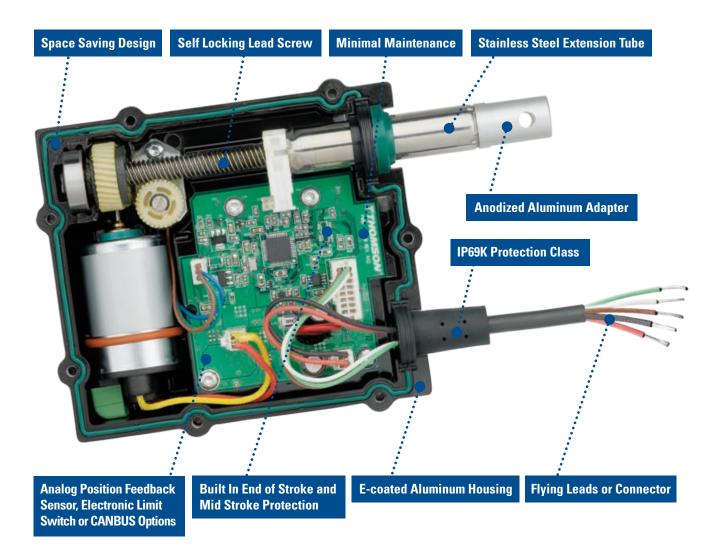

The rugged aluminum housing offers IP69K/IP67 sealing and is e-coated for corrosion resistance to make the throttle actuator virtually maintenance-free.

Need something extra? The Electrak® Throttle actuator can be tailored to your specific application requirements and Thomson engineers are always available to help select an actuator for your application needs.

Electrical Installation

Cable and Connector Installation

Connect the actuator according to the table below. Actuator will extend if connected as in the table, shift polarity between red (pin 1) and black (pin 3) leads and it will retract. Mating Deutsch connector kit can be ordered from Thomson (P/N 9100-448-021). Note: Connector pin 2 is not used, but contains a sealing plug.
